

DRINKING WATER TESTING LABS

Compiled by the Allegany County Department of Health

The lists below are laboratories that provide information, sampling instructions and containers, and analyses for private or public water supplies in our area. All analyses needed to comply with any regulation (Subpart 67-4 Lead Testing in School Drinking Water) must be performed by a laboratory certified by the New York State Department of Health Wadsworth Center under the Environmental Laboratory Approval Program (ELAP).

When you are concerned about the microbiological quality of your water, the levels of minerals or metals (inorganic), or the possibility of solvent (organic) contamination of you water, you are encouraged to contact the Environmental Health Division of the Allegany County Department of Health for consultation. If you choose to utilize the services of any of these labs, you should call them as soon as you decide to conduct sampling. In all cases, it will be necessary to obtain instructions and appropriate sampling containers from the lab and this may entail a few days wait before sampling may begin. **In no case should you sample before contacting the laboratory!**
